#MATERIAL

Un objeto se convierte en una obra de arte cuando su creador ha elegido el material óptimo para su realización.

No podemos presentarle *“una obra de arte”* sin cuidar hasta el más mínimo detalle, desde su corazón cimentado mediante zapatas aisladas y losa continua de hormigón armado, hasta la fachada con aislamiento térmico (SISTEMA SATE).

An object becomes a work of art if the author chose the best material for its realization.

We cannot present *“a work of art”* without paying attention to the slightest detail, from its heart, cemented by insulated footings and continuous reinforced concrete slab, to the façades with thermal insulation (SATE SYSTEM).
