

ERDGESCHOSS

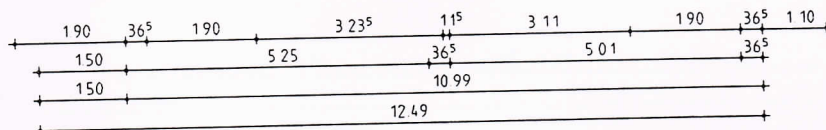

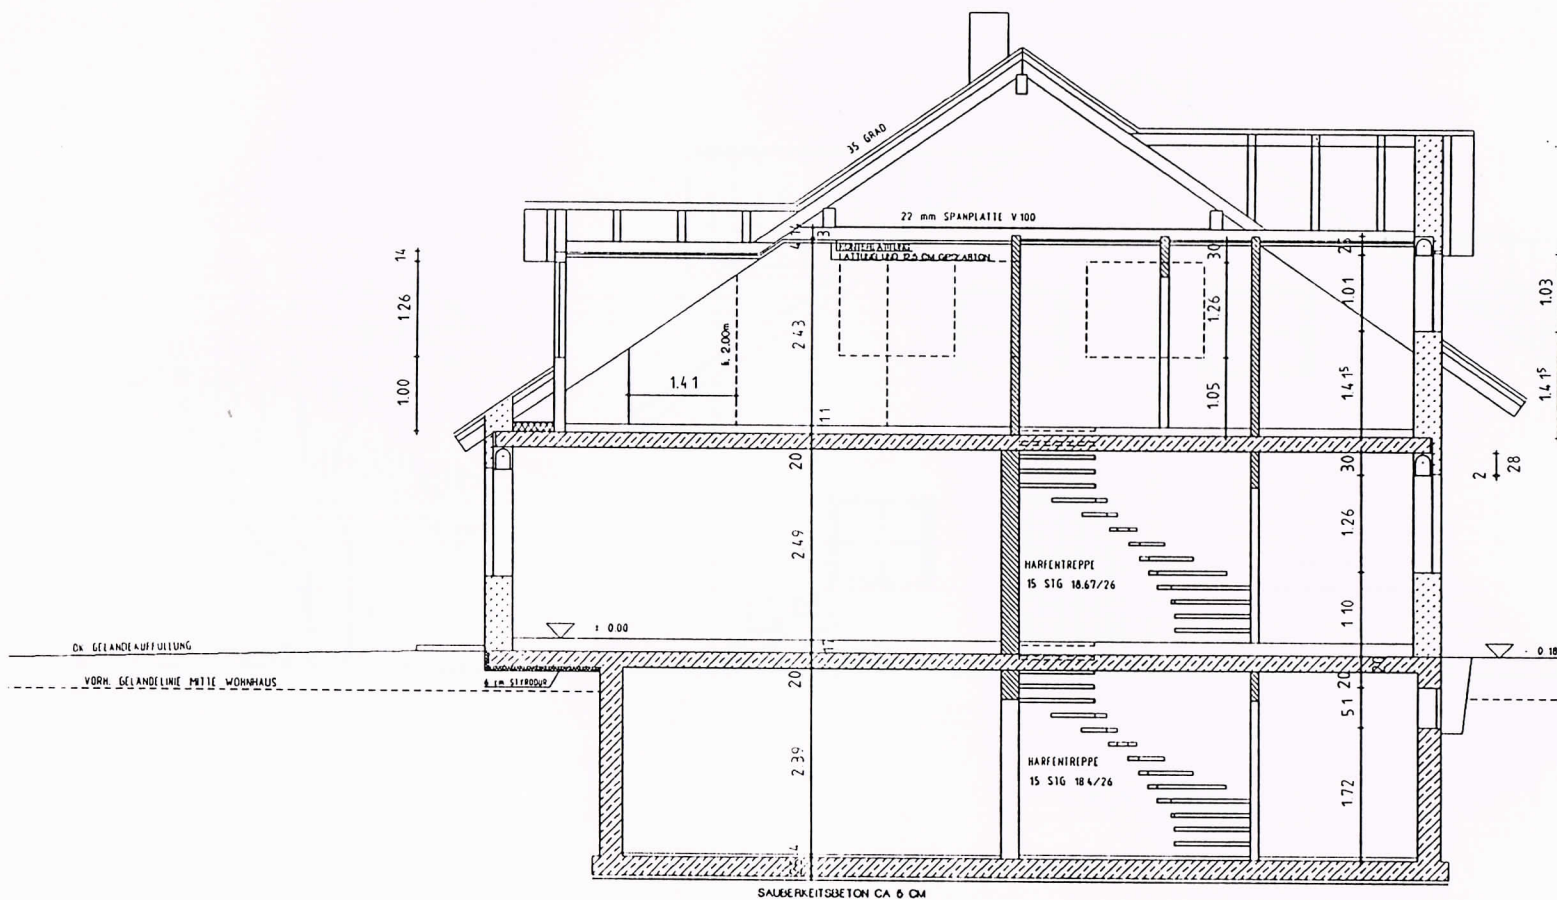

Figure 1: A schematic diagram of a 1D lattice chain with 16 sites. The sites are numbered 1 to 16 from left to right. The chain is divided into four segments of four sites each. The first segment (sites 1-4) has a total length of 3.075. The second segment (sites 5-8) has a total length of 3.075. The third segment (sites 9-12) has a total length of 3.075. The fourth segment (sites 13-16) has a total length of 3.075. The total length of the chain is 12.225. The diagram shows the positions of the sites and the lengths of the segments.
